AQUACULTURE DEMANDS

Aquaculture demands a great deal of a liner and requires a special material to offer the balance of properties necessary to best meet those needs. Reef Industries would like to introduce Permalon®, a non-toxic, cross-laminated high-density polyethylene membrane ideal for lagoons, tanks, raceways or other facilities where water management is an investment. Aquaculture applications demand high performance and reliability. Permalon® products deliver exceptional tear and puncture resistance to handle the most demanding conditions and outstanding service life to ensure low life cycle costs.
