## COMPLETE MOISTURE CONTROL FOR YOUR CONCRETE SLABS

Reef Industries, the technological leader of reinforced film laminates, manufactures lightweight, rugged and durable cost-effective solutions to ensure effective concrete curing and slab moisture vapor control. For nearly 50 years, our products have become the #1 choice of architects, specifiers and contractors to effectively control concrete curing and eliminate moisture, deterioration and mildew from occurring in the building.

Griffolyn®, founded in 1957, is the original division of Reef Industries and is a reinforced vapor retarder product that protects against moisture infiltration into a buildings envelope. The Griffolyn® Vapor Protection System components consist of several high performance polyethylene vapor retarder material made of high density polyethylene, low density polyethylene or linear low density polyethylene all of which are reinforced with a patented heavy-duty polyester cord grid for high strength and durability. This reinforcement grid provides superior strength, eliminating tears and punctures commonly associated during installation. Additionally, Reef Industries provides Fab Tape to help create a durable field seam to be used between multiple vapor retarder sections to help control the penetration of moisture.

As new technologies and innovations surfaced over the years, Reef Industries introduced new product lines to meet and exceed market demands. One of these products known as Transguard® is a reusable, wet curing cover ideal for concrete control for both field and pre-cast applications. Transguard® 4000 Curing Covers are excellent for maintaining proper moisture control during the concrete curing process whereby reducing cracking, scaling and dusting. This product features exceptionally low permeability, easy installation and is reflective against heat.

The value and performance of The Griffolyn® Vapor Protection System and Transguard® 4000 Curing Covers are unsurpassed in the industry. All products can be custom designed to meet your project's specifications. For more information on how Reef Industries can help you protect your investments, please visit us at World of Concrete, Booth # S12107 or contact us at 800-231-6074.
