NEED BETTER COMMUNICATION?

For years, Reef Industries has been the technological leader in manufacturing reinforced film laminates and plastics. We offer a comprehensive stock of barricade and marking tapes ready for immediate shipment.

Terra Tape™, a division of Reef Industries, is the industry leader in quality underground detectable and non-detectable marking tapes. This product is an approved and specified warning system ideal to alert workers of buried pipes or cables to protect against accidental dig-ins. Available in seven grades, standard APWA color codes, extra long roll lengths, multi-colored printing and custom fabrication available.

In addition to Terra Tape™, Reef Industries provides Banner Guard® printed barricade tapes. This product is an effective way to restrict entry to hazardous areas ideal for construction sites, roadwork areas, industrial locations, as well as crime and fire scenes. Banner Guard® barricade tapes are available in four different strengths: Economy, Standard, Six-Ply and Super-Strength II. Banner Guard® can be custom fabricated allowing messages such as “POLICE LINE DO NOT CROSS” and “CAUTION CONSTRUCTION AREA” to provide clear and concise communication. Tapes can also be custom imprinted with company name and/or logo.

Whether you need to temporarily control and secure an area quickly and easily or you need to restrict entry to a hazardous area, Reef Industries will provide you with a dependable product for your specific application. For more information on how Reef Industries will provide you with a dependable product for your specific application, please contact us at 1-800-231-6074 or email ri@reefindustries.com.
