## DOES YOUR PROJECT REQUIRE A RELIABLE POND LINER?

Protect your pond from seepage, runoff and erosion with Reef Industries' Permalon® Pond Liners. Our pond liners are constructed using a variety of state-of-the-art composites that offer the greatest tensile strength to weight ratio for the most demanding conditions. Alloyed HDPE resists punctures and tears for a more secure system.

Permalon® is available in a variety of thicknesses, appropriate for various applications and can be custom configured to meet your projects specific demands. Additionally, Permalon® is UV stabilized and cold crack tested to withstand up to -60 F and will endure repeated thermal expansion.
