### RESTRICT ACCESS AND PREVENT COSTLY MISTAKES

For over 50 years, Reef Industries has been providing the public works market in all levels of municipal, county and state governments with the means to restrict access to hazardous areas and to prevent costly dig-ins.

Terra Tape®, a division of Reef Industries, provides high quality detectable and non-detectable underground marking tapes for identifying, protecting and locating buried lines. Terra Tape® is available in seven different material grades to suite your project requirements and is available in 3 mil to 8 mil thicknesses. Standard APWA color codes and extra long roll lengths are available. Terra Tape® can also be custom imprinted with company name and/or logo.

In addition to Terra Tape®, Reef Industries provides Banner Guard® printed barricade tapes. This product is an effective way to restrict entry to hazardous areas ideal for construction sites, roadwork areas and industrial locations. Banner Guard® barricade tapes are available in four different strengths depending on your project needs.

From utility construction to storm water collection, Reef Industries will provide you with a dependable product for your specific application. For more information on how Reef Industries will provide you with a dependable product for your specific application, please contact us at 1-800-231-6074 or email [ri@reefindustries.com](mailto:ri@reefindustries.com).
