SAVE YOUR HAY AND YOUR MONEY

Reef Industries manufactures Griffolyn® Hay Covers ideal to keep your field hay nutritious and well-maintained even in the most adverse weather conditions. In addition to dry matter loss, nutritional value of uncovered hay suffers significantly from outdoor storage. Griffolyn® Hay Covers offer a proven method for protecting your field hay due to its high-strength, reinforced, fabricated multiple layers that do not rip or tear. These covers are also UV stabilized and can withstand constant sun exposure. They are cold-crack resistant and moisture resistant. Custom fabrication, including the addition of grommets, pipe loops and other tie-down methods, is available to meet your exact requirements. For more information and free samples, call 1-800-231-6074 or email ri@reefindustries.com.
