NEW Greenhouse Cover for High UV Level Environments

Reef Industries introduces a new lightweight, rugged and durable greenhouse cover ideal to protect investments from unwanted light transmission. The Griffolyn® TX-1600GH is a clear, 12mil polyethylene material containing 60% more UV stabilizer additive than its predecessor making it a favorable choice in environments with above average UV levels. The new Griffolyn® TX-1600GH is available in 5' wide sections and/or can be custom fabricated to meet your exact requirements. Our patented Griffolyn® Greenhouse Covers are available in various colors and material grades depending on your protection needs.
