

KEEP YOUR PLANT OPERATIONS RUNNING SMOOTHLY

GRIFFOLYN® CONTAINMENT PRODUCTS

Griffolyn® internally reinforced polyethylene laminates have been designed for a wide range of prospective applications. When your project requires a product that protects against light, weather, contaminants and other elements, specify Griffolyn®. It is performance engineered to be highly resistant to tears and punctures with an exceptional ability to withstand extended exposure to weather. Whether providing storage and protection of parts or containment and isolation of contaminated materials, Griffolyn® products may be designed and fabricated to your specific needs and requirements.
